2020-2024

PROFILE

Hello, I'm Vaishnavi, a computer science engineering student from Kerala, India. I'm passionate about programming and love to work with Python, HTML, CSS, and JavaScript. As a student, I'm constantly learning and exploring new technologies to enhance my skills and knowledge in the field of computer science.

In my free time, I enjoy working on personal projects that challenge me and help me develop new skills. I am always looking for ways to improve and make a positive impact through my work.

MY ACHIVEMENT

One of my proudest achivements is participating in the All Kerala Women Hackathon organised by Tinkerhub and placing among the top five teams.During the competition,my team and I tackled a challenging problem and worked collaboratively to develop an innovative solution using our coding and problem-solving skills.
My success in the Hackathon not only demonstrated My technical capabilities but also my ability to work efficently in a team under pressure.Through the experence,I gained valuable insights into the importance of communication,time management,and adaptability in project management.

MY PROJECTS

Web scrapping
Python|BeautifulSoup

I utilized the BeautifulSoup library to scrape data from the Times Job website.It shows the details of python related job.

Sleep Detection
Python|Pygame

Developed a sleep detector with alarm feature for drivers to prevent accidents caused by drowsiness while driving.

Emotion Detection
Python|Deepface

Designed an emotion detector for vehicles to ensure safe driving by preventing the vehicle from starting if the driver is angry.
